

Los Angeles Refinery

Fact Sheet

REFINERY INFORMATION

The Los Angeles refinery is located in Los Angeles County, near the Los Angeles Harbor, on approximately 930 acres. The Los Angeles refinery is the largest refinery on the West Coast and is a major producer of clean fuels. At full capacity, it operates at 363,000 barrels per calendar day (bpcd). The refinery processes heavy crude from California's San Joaquin Valley and Los Angeles Basin, as well as crudes from the Alaska North Slope, South America, West Africa and other international sources. It manufactures gasoline, jet fuel, diesel fuel, petroleum coke, fuel oil, propylene and calcined coke.

The Los Angeles Refinery receives crude at its marine terminals in Los Angeles and Long Beach Harbors and ships products throughout southern California, Arizona and Nevada via its connections to several product distribution pipelines and terminals. It distributes all grades of gasoline and ultra-low-sulfur diesel, primarily to MPC's retail system under the ARCO®, Shell®, Exxon®, Mobil®, USA Gasoline™ and Tesoro® brands. Its Watson Cogeneration plant produces 400 MW, and is the largest cogeneration facility in California.

ABOUT MARATHON PETROLEUM CORPORATION

Marathon Petroleum Corporation (MPC) is a leading, integrated, downstream energy company headquartered in Findlay, Ohio. The company operates the nation's largest refining system with more than 3 million barrels per day of crude oil capacity across 16 refineries. MPC's marketing system includes branded locations across the United States, including Marathon brand retail outlets. Speedway LLC, an MPC subsidiary, owns and operates retail convenience stores across the United States. MPC also owns the general partner and majority limited partner interests in two midstream companies, MPLX LP and Andeavor Logistics LP, which own and operate gathering, processing, and fractionation assets, as well as crude oil and light product transportation and logistics infrastructure.

FAST FACTS

- Los Angeles refinery full-time employees: Approx. 1,450
- Crude oil capacity: 363,000 bpcd

ENVIRONMENT

- Aims to deliver the most effective and efficient production of electrical power and steam.
- Set goal to reduce NOx emissions from combustion equipment by 53 percent by 2022.
- Reducing greenhouse gas emissions by 70,000 metric tonnes over the next three years through a modernization and integration project and decommission of aging equipment.
- Received the first LEED (Leadership in Energy & Environmental Design) certification for an office building in Carson County.
- Reduced flaring emissions greater than 75 percent from five years ago.

HEALTH AND SAFETY

- Is in the top 25 percent in refining industry personal safety performance.
- Received a 2017 Safety Achievement Award from AFPM.

COMMUNITY SUPPORT

- Provided a two-year, \$150,000 grant to fund the Cabrillo Marine Aquarium's Sea Search Marine Biology program.
- Provided a four-year, \$250,000 grant to the National Red Cross to purchase, equip and deploy a new emergency response vehicle in the Los Angeles County area.
- Provided a three-year, \$450,000 grant to Pacific Battleship Center to fund its STEM education program aboard the Battleship USS Iowa for middle school students.
- Partnered and/or sponsors various youth, government and STEM education programs across Southern California, including multiple Boys and Girls Clubs and YMCA locations.
- Donated \$4.5M in charitable giving to non-profit organizations across Southern California in 2017.
